WR WATER RESIN

TECHNOLOGY

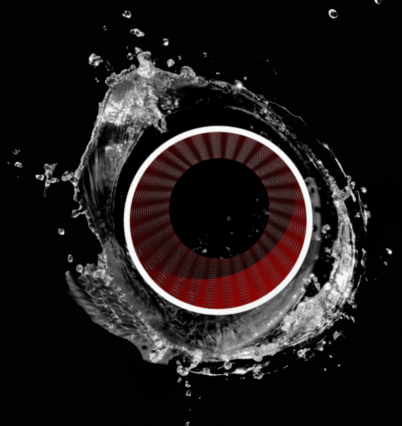

BETTER PERFORMANCE AND RELIABILITY.

WR Technology rappresenta l'applicazione di 3 fondamentali nuovi concetti nel processo produttivo.

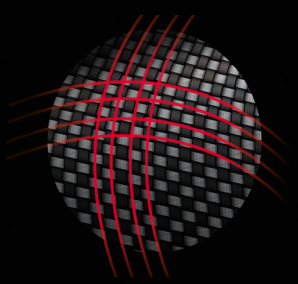

WR Technology is the application of 3 fundamental new concepts in the production process.

WR Technology représente l'application de 3 nouveaux concepts fondamentaux dans le processus de production.

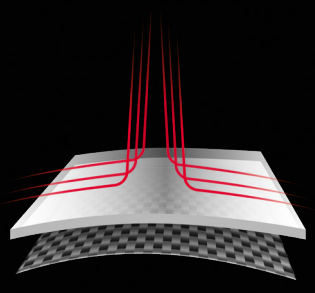

WR Technology constituye la aplicación de tres nuevos conceptos fundamentales en el proceso de producción.

WATER RESIN

CARBON FABRIC STRUCTURE

CUSTOM OVEN PROCESS

PERFORMANCE VINCENTI & AFFIDABILITA' SENZA PARI COLMIC rappresenta l'avanguardia nella produzione di canne di qualità superiore per l'agonismo e per il pescatore. WR Technology rappresenta l'applicazione di 3 fondamentali nuovi concetti nel processo produttivo:

1. WATER RESIN
È la resina intorno alla quale si sviluppa il concetto di WR Technology. Questa componente è contraddistinta da FLUIDITA' simile all'ACQUA, da ciò il nome WATER RESIN, che permette di penetrare nelle trame del carbonio per dare compattezza e robustezza alla sezione eliminando le bolle d'aria che costituiscono punti di debolezza.

2. CARBON FABRIC STRUCTURE
È la disposizione delle fibre di carbonio studiata per favorire ancor più la penetrazione della Water Resin implementando la qualità del processo di assemblaggio.

3. CUSTOM OVEN PROCESS
È il processo di cottura studiato in relazione alle caratteristiche dei materiali e delle resine impiegate. I tempi e le modalità di cottura della sezione vengono ottimizzati in relazione alle specificità delle varie sezioni delle canne su cui il metodo WR è impiegato.

WR Technology significa rivoluzionare il sistema produttivo del nostro prodotto di punta per ottenere PERFORMANCE VINCENTI E AFFIDABILITÀ SENZA PARI. Canne non solo più leggere e più bilanciate, ma anche più affidabili e più robuste.
La cura e lo studio dei processi produttivi sono il frutto di decenni di esperienza nella produzione di canne da pesca. Colmic affianca tale Know How alla ricerca d'avanguardia.
WR TECHNOLOGY, QUALITA' SUPERIORE.

WINNING PERFORMANCE AND UNEQUALLED RELIABILTIY COLMIC is the avant-garde in the production of superior quality rods for competition and angling. WR Technology is the application of 3 fundamental new concepts in the production process:

1. WATER RESIN
It is the resin around which the concept of WR technology has been developed. This component is characterized by WATER-like FLUIDITY, hence the name WATER RESIN, which allows it to penetrate the carbon weave to give the section compactness and strength by eliminating the air bubbles that act as points of weakness.

2. CARBON FABRIC STRUCTURE
It is the arrangement of carbon fibers designed to allow the water resin to soak in even further by implementing the quality of the assembly process.

3. CUSTOM OVEN PROCESS
It is the firing process designed in relation to the characteristics of the materials and resins used. The section firing times and methods are optimized in relation to the specific features of the various rod sections on which the WR method is used.

WR technology means revolutionizing the production system of our flagship product to achieve WINNING PERFORMANCE AND UNEQUALLED RELIABILITY. These rods are not only lighter and more balanced, but also more reliable and robust.
The care and study of production processes are the result of decades of experience in producing fishing rods. Colmic combines this know-how with cutting-edge research.
WR TECHNOLOGY, SUPERIOR QUALITY.

S31 UNLIMITED

Questa tecnologia evolutiva ci ha permesso di abbattere nuovamente i nostri limiti e di rendere ancora più confortevole l'utilizzo dell'attrezzo in fase dinamica.
Il concetto di polivalenza, che tanto ci è caro, non è stato scalfito in alcun modo, fermo restando un evidente miglioramento di tutte le roubasienne in bilanciatura e quindi in maneggevolezza.

This evolutionary technology has enabled us to break down our limitations once again and make the use of the equipment even more comfortable in the dynamic phase.
The concept of versatility, which we hold so dear, has not been affected in any way, although there has been a clear improvement in the balance and therefore handling in all the pole.

TECH TUBE

TECH TUBE CARBON, un materiale dalle caratteristiche inimmaginabili. La difficoltà di applicazione di questo materiale, di finissimo spessore, sul mandrino in acciaio non ci ha fatto desistere ed il risultato è stato spettacolare. Abbiamo realizzato il sogno di ogni pescatore: una canna sempre più leggera, più resistente alle rotture ed allo stesso tempo più rigida. Con il Tech tube Carbon possiamo ridurre il peso delle sezioni anche del 15% rispetto agli attuali carboni, aumentare la rigidità dal 5% al 10% e l'affidabilità di un altro 10%.

TECH TUBE CARBON is a material with unimaginable characteristics. The difficulty of applying this very thin material to the steel spindle did not deter us and the results are spectacular. We have made every fisherman's dream come true with our rod that is lighter, more resistant to breakage and yet more rigid at the same time. With Tech Tube Carbon, we can reduce the weight of the sections by up to 15% compared to current carbon, increase rigidity by 5% to 10% and increase reliability by 10%.

TITANIUM REINFORCE

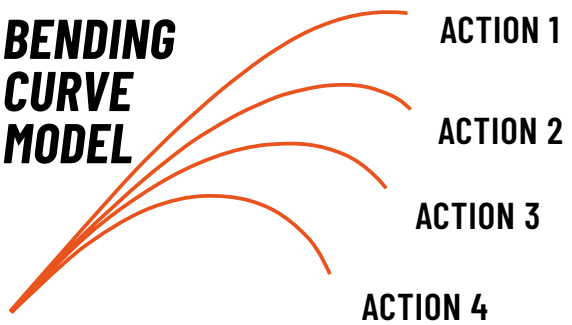

Alla base di tutte le sezioni sono state applicate delle lamine in titanio per aumentarne la resistenza in compressione. Titanium Joint rende ogni sezione più robusta senza aggiungere pesi in eccesso.

At the base of all sections have been wrapped Titanium foil layers, that increase the resistance to compression. The Titanium Joint Part system make every section stronger without adding weight in excess.

CARBON ULAF ULTRALIGHT AEROSPACE FIBERS

U.L.A.F. PRO FORCE è un particolare processo di stratificazione che crea una sottilissima membrana (o lamina) di carbonio composta da fibre orientate in tre direzioni. Lo speciale orientamento e l'esclusiva resina Filler Inside ad alta densità, già impiegata per l'impregnazione del carbonio U.L.A.F. donano una elasticità superiore, riducendo il peso che fino ad oggi era necessario per aumentare la capacità di assorbire urti.

PRO FORCE U.L.A.F. is a special process of stratification that creates a superfine membrane (or foil) of carbon composed of fibers arranged in three different directions. This orientation and the exclusive high-density Filler Inside resin, already utilized for the impregnation of the Ultra-Light Aerospace Fiber carbon, yield greater flexibility, reducing the weight that was previously required to boost the shock-absorbing capacity.

Joint Line

Il Colmic Joint Line è un sistema di riferimento che permette di allineare le sezioni sull'asse di maggiore rigidità. Questo sistema è di particolare importanza sulle RBS dove la rigidità è di primaria importanza. Con il Joint Line si aumenta la rigidità del 12%.

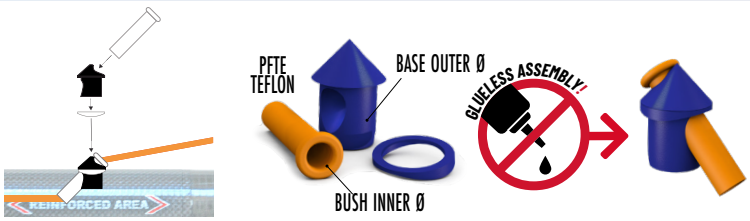

The Colmic Joint Line is a reference system which allows to align all section on the main rigid axis. This is mainly important on poles because of the big importance of its stiffness. Joint Line increases the stiffness of the 12%.

STRONG SECTIONS

NEW 2025

Le "STRONG SECTIONS" sono sezioni molto robuste costruite sugli stampi delle serie SUPERIOR, ZETA, STRATUS/EPIK. Sono state ideate per essere impiegate come basi quando si pesca a 5, a 6 o a 7 pezzi e c'è la necessita di avere un attrezzo solido e robusto che consenta di pescare in tranquillità e sicurezza salvaguardando l'integrità dei pezzi originali sia impiegando i Top Kit Match che quelli Carpa.

The "STRONG SECTIONS" are very robust sections built on the moulds of the SUPERIOR, ZETA and STRATUS/EPIK series. They have been designed to be used as bases when fishing with 5, 6 or 7 pieces and there is a need to have a solid and robust tool that allows you to fish in peace and safety while safeguarding the integrity of the original pieces when using both Match and Carp Top Kits.

LATERAL LINE

INTERNAL LINE

ANTENNA LINE

SLIDING

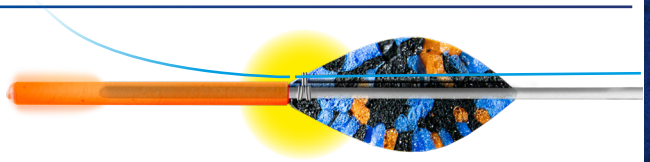

BODY CUT

Taglio laterale che permette di non fare rovinare il corpo del galleggiante ed il nylon quando lo si fa scorrere sulla lenza per variare la profondità di pesca.

Side cut to avoid damages on the float body and the line when sliding it to vary the fishing depth.

SS-RING

Anellino in acciaio inox ancorato direttamente sulla deriva passante. Impossibile da strappare se sottoposto a qualsiasi tipo di sollecitazione.

Stainless steel ring directly anchored on the through-drive. Impossible to tear .

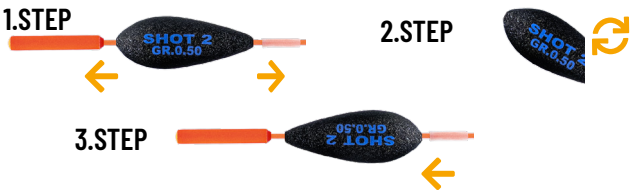

MICRO BUSH

Boccola porta starlite di dimensioni ridotte tali da contenere il volume del corpo dei galleggianti ed aumentarne la sensibilità.

Small starlite holder bush to reduce the volume of the float body and increase its sensitivity.

REVERSIBLE BODY

Per tutti i galleggianti a filo passante interno, prima di fare la montatura è possibile capovolgere il corpo sulla deriva e modificarne la forma, il baricentro, la stabilità e l'assetto in pesca.

For all inner-line floats, the body can be turned before mounting it in order to change its shape, center of gravity, stability and buoyancy.

SINFLEX

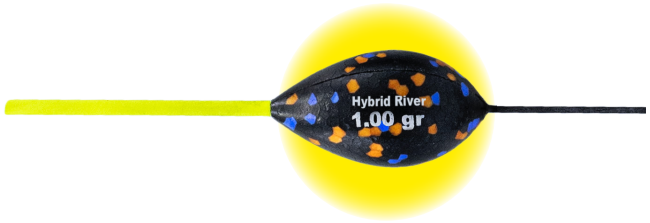

Materiale plastico ultraleggero molto robusto (che sostituisce la vecchia penna di pavone) la cui caratteristica più importante è quella di non deformarsi anche se sottoposto a temperature elevate. L'asta rettilinea facilita la precisione del lancio.

A very strong but ultra-light plastic material (replacing the old peacock feather) .

It does not change its shape even when subjected to high temperatures. The straight shaft facilitates precise throwing.

CC-POLYMER

Closed-Cell Polymer: nuovissimo materiale a cellule chiuse assemblato con stampo a caldo che permette di ottenere un galleggiante con un corpo di dimensione ridottissima ed un bilanciamento perfetto.

Closed-Cell Polymer: a brand new closed-cell material assembled by hot moulding that allows to obtain a float with a very small body size and perfect balance.

POLYURETHANE

Poliuretano: materiale espanso a cellule chiuse ad alta densità, impermeabile, robusto e leggero impiegato per la realizzazione dei corpi dei galleggianti in alternativa alla Balza.

Polyurethane: high-density, waterproof, robust and lightweight closed-cell foamused for the construction of float bodies as an alternative to Balza.

ROHACELL

Materiale espanso a cellule chiuse, leggero come la migliore balza ma con una struttura dura e tenace che permette di avere corpi dei galleggianti di un volume molto contenuto ed una resistenza meccanica notevole.

A closed-cell foam material, as light as the best flounce but with a hard, tough structure that allows to construct very small bodies of floats but with considerable mechanical strength.

REMOVABLE ANTENNA

Sistema per sostituire l'antenna sul corpo del galleggiante per migliorarne la visibilità e personalizzarne la sensibilità con antenne più o meno sottili.

Easy system for replacing the antenna on the body of the float to improve its visibility and customise its sensitivity with different antennas.

LEADED

Galleggiante con corpo piombato per aumentarne il peso ma ridurne la portata. Con questo vecchio sistema possiamo avere piombature leggere sulla lenza ma galleggianti tali da poter essere impiegati anche a distanze considerevoli.

A float with a leaded body to increase its weight but reduce its range. Thanks to this, we can have light sinkers lines but floats that also be used at considerable distances.

REMOVABLE BRASS LEAD

Ottone removibili per variare la portata sulla lenza del galleggiante.

Removable brass lead to vary the flow rate on the line.

FLOAT STOPPER + SWIVEL

5

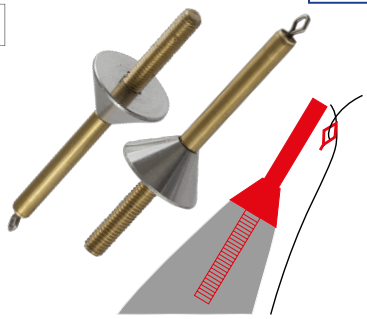

Questo dispositivo consente di trasformare un galleggiante di struttura classica in un galleggiante di tipo inglese. Inserendo all'interno del tubetto in silicone la deriva di un qualunque galleggiante potremo avvalerci della tecnica english style.

This accessory allows you to transform a classically shaped float into a waggler-type float. By inserting the stem of any float into the silicone tube you can transform it to English style every time you need to. Very useful in both freshwater and sea angling.

CODE	BARCODE
FECO03	8 033312 050328

ALUMINIUM HEADS

2

Queste testine di alluminio, sono state ideate e realizzate per rendere un qualsiasi galleggiante inglese con rondelle, un galleggiante a scorrere che porti sulla lenza grammature sostenute. Infatti, togliendo la testa piombata del nostro galleggiante e inserendo questa testina di alluminio, possiamo ottenere le solite caratteristiche di un classico galleggiante inglese.

These heads in aluminium have been designed and produced to transform any waggler with rings into a running float that can carry even significant weights on the line. By removing the weighted head of the waggler and replacing it with this aluminium head, you can obtain all the classical features of a waggler designed specifically for English-style fishing.

SECOL POWER-F

30m 50m Seaguar TERMINAL LINE FLUOROCARBON

LINES
MADE IN JAPAN

L'azienda giapponese SEAGUAR, leader nella produzione di Fluorocarbon, studia e si rinnova costantemente grazie all'ausilio di un team di esperti e di nuove tecnologie sempre all'avanguardia, offrendo al mercato prodotti unici nel suo genere. Nasce così SECOL un fluorocarbon di nuava generazione.
- INVISIBILITÀ IN ACQUA SENZA PARAGONI;
- RESISTENZA ALL'ABRASIONE MAI VISTA PRIMA;
- STRABILIANTE TENUTA AL NODO;
-INEGUAGLIABILE NEL CONFERIRE ALL'ESCA MOVIMENTI NATURALI;
Quattro caratteristiche essenziali, 4 punti di forza straordinari!!!

The Japanese SEAGUAR company, leader in manufacture of fluorocarbons, has been constantly researching and improving its products, thanks to of a team of experts and new technologies that are always at the avant-garde. The result is an offer of products unique in their genre as to quality. So, SECOL, a new generation fluorocarbon was born.
- INVISIBILITY IN WATER WITH NO COMPARISONESISTENZA;
- NEVER EXPERIENCED RESISTANCE TO ABRAHASION;
- ASTONISHING KNOTH STRENGTH;
- IT GIVES TO THE BAIT A VERY NATURAL MOVEMENT;
Four main featuires, 4 exceptional points of strength!

SECOL MATCH

50m Seaguar TERMINAL LINE FLUOROCARBON

L'azienda giapponese SEAGUAR, leader nella produzione di Fluorocarbon, studia e si rinnova costantemente grazie all'ausilio di un team di esperti e di nuove tecnologie sempre all'avanguardia, offrendo al mercato prodotti unici nel suo genere. Nasce così SECOL un fluorocarbon di nuava generazione.
- INVISIBILITÀ IN ACQUA SENZA PARAGONI;
- RESISTENZA ALL'ABRASIONE MAI VISTA PRIMA;
- STRABILIANTE TENUTA AL NODO;
-INEGUAGLIABILE NEL CONFERIRE ALL'ESCA MOVIMENTI NATURALI;
Quattro caratteristiche essenziali, 4 punti di forza straordinari!!!

The Japanese SEAGUAR company, leader in manufacture of fluorocarbons, has been constantly researching and improving its products, thanks to of a team of experts and new technologies that are always at the avant-garde. The result is an offer of products unique in their genre as to quality. So, SECOL, a new generation fluorocarbon was born.
- INVISIBILITY IN WATER WITH NO COMPARISONESISTENZA;
- NEVER EXPERIENCED RESISTANCE TO ABRAHASION;
- ASTONISHING KNOTH STRENGTH;
- IT GIVES TO THE BAIT A VERY NATURAL MOVEMENT;
Four main featuires, 4 exceptional points of strength!

Fluorocarbon con un grado di rifrazione più basso del 80%, rispetto a qualsiasi altro nylon tradizionale. Molto resistente, mantiene invariato il carico di rottura anche dopo un lungo periodo in acqua.

A Fluorocarbon with a refraction coefficient 60% lower than any other traditional nylon. Great resistance and a breaking strength that remains unchanged even after long periods in the water.

Rivoluzionario fluorocarbon che migliora le già eccellenti caratteristiche tecniche della gamma SEAGUAR. Maggiore morbidezza, leggerezza e resistenza grazie all'avanzata tecnologia utilizzata per il suo sviluppo.

It is a revolutionary monofilament that improves on the already excellent characteristics of the SEAGUAR family. An extraordinary suppleness, absolutely comparable to that of a classic nylon.

Fluorocarbon innovativo in casa Seaguar. Grazie a delle esclusive resine oltre ad essere più morbido, ad avere una maggiore resistenza all'abrasione e minimo allungamento, l'esclusivo colore rosa lo rende ancora più invisibile grazie al bassissimo grado di rifrazione. Una parte del ricavato della vendita di questo monofilo, Seaguar lo devolve alla lotta contro il cancro.

Innovative Fluorocarbon. Thanks to its exclusive resins, it's softer but able to support a bigger resistance against abrasions and a minimum extension . Its exclusive color pink makes it much more invisible, thanks to its low refraction level. A part of the Seaguar's sale proceeds will be devolved to the foundation against cancer.

Premier Big Game ha diametri inferiori e maggiore tenuta rispetto al tradizionale Big Game. Offre una incredibile forza al nodo ed una memoria molto bassa pur essendo un fluorocarbon molto morbido. E' ideale per grosse prede, sia in acque interne che salate.

Fluoro Premier has smaller diameters and increased strength vs. our traditional Big Game line. Fluoro Premier offers incredible knot and tensile strength and is an extremely soft line with low memory. Ideal for larger species in fresh or salt water. As with all 100% Fluorocarbon products, Fluoro Premier Leader is invisible underwater and to fish.

Le innovative ed esclusive resine rendono questo fluorocarbon unica al mondo: il più resistente alla trazione, all'abrasione e al nodo. Invisibile in acqua. Inalterabile dai raggi uv. Per il carico di rottura utilizziamo due diverse misurazioni. La prima viene misurata con specifici strumenti di precisione, la seconda in fase di pesca con attrezzature specifiche. I dati possono variare a causa dell'esposizione alla luce, umidità e temperatura.

Innovative resins make this fluorocarbon unique: it the most resistant to tensile strength , abrasion and knotting resistance. Invisible in water. Uv rays inalterable. We use two different measurements for the breaking load. The first uses specific precision machines, while the second is measured when fishing with specific equipment. Data may vary depending on humidity, temperature and exposure to light.

- Invisibile in acqua
- Carico di rottura eccezionale
- Grande tenuta al nodo
- Morbidezza eccellente
- Resistenza all'abrasione oltre il normale
- Formato salvaspazio della bobina. Particolare di non poco conto, quando l'agonismo o le necessità personali, ci obbligano.

- Invisible in the water
- Exceptional tensile strength
- Very high knot tightness
- Excellent smoothness
- Extraordinary abrasion resistance
- Space-saving spool format.
  A detail of no small importance, when competitiveness or personal needs force us to.

La collaborazione con una delle maggiori industrie giapponesi ha permesso di sviluppare appositamente per noi un Fluorocarbon dalle ottime caratteristiche tecniche in una gamma molto estesa di diametri, specialmente nei diametri alti. Il tutto ad un rapporto qualità prezzo veramente eccezionale.

The partnership with a major Japanese industrry has enabled us to develop a Fluorocarbon with excellent technical characteristics in a very wide range of diameters, especially the high ones. This has an excellent price/quality ratio.

Filo da finale adatto alla pesca in mare e in acqua dolce. Tutte le misure disponibili possiedono le caratteristiche che solo COLMIC è in grado di dare: morbidezza, assenza di memoria, assenza di torsione, eccezionale tenuta sul nodo, estrema resistenza all'abrasione e invisibilità. ZAYO da oggi diviene sinonimo di qualità impareggiabile.

Hook length for fishing in salt and fresh water. All available measures have the characteristics COLMIC only is able to give: smoothness, absence of memory, absence of torsion, exceptional resistance to the knot and to abrasion and invisibility. Zayo is now synonymous with quality.

Le tre caratteristiche principali del KING sono l'eccezionale tenuta sul nodo, l'estrema resistenza all'abrasione e invisibilità che solo il fluorocarbon 100% COLMIC è in grado di donarci. Il fluorocarbon KING è la dimostrazione che i diametri sottili possono permettere prestazioni prima inimmaginabili.

The three main characteristics of KING are the exceptional resistance to the knot, to abrasion and invisibility that only 100% fluorocarbon COLMIC is able to ensure.

RYOSHI

NEW 2025

150m 300m 600m NYLON

Monofilo di ultima generazione ad altissimo livello tecnologico, leader dei monofilo da pesca. Si presta ad essere utilizzato nelle più svariate tecniche, sia nel mare che in acqua dolce. Il trattamento esterno (FLUORINE COATED) ne favorisce la scorrevolezza e lo rende impermeabile all'assorbimento dell'acqua. La grande resistenza alla trazione e all'abrasione lo rendono ideale per la costruzione di terminali e per il mulinello. Grande tenuta al nodo, basso allungamento inalterabile ai raggi UV. Per il carico di rottura utilizziamo due diverse misurazioni. La prima viene misurata con specifici strumenti di precisione, la seconda in fase di pesca con attrezzature specifiche. I dati possono variare a causa dell'esposizione alla luce, umidità e temperatura.

Monofilament of the latest generation with the highest technological level, the leader of fishing monofilaments. It is suitable for the most varied techniques, both for the sea and in fresh water. The external treatment (FLUORINE COATED) favours the smoothness and makes it impermeable to water absorption. Its great tensile strength and abrasion resistance makes it ideal for both hooklenghts and spooling. High knotting resistance, low elongation and UV rays resistant. We use two different measurements for breaking load. The first uses specific precision machines, while the second is measured when fishing with specific equipment. Data may vary depending on humidity, temperature and exposure to light.

VOLT - LONG CAST

NEW 2025

300m 1000m NYLON

Esclusivo monofilo di ultima generazione. Il triplo trattamento di resine sintetiche addizionate con microfibre fisse e il rivestimento esterno in fluorocarbon ne favoriscono la grande scorrevolezza e la grande durata. La totale assenza di memoria, l'alto grado di resistenza all'abrasione, il basso assorbimento di acqua, l'alta resistenza al nodo, sono caratteristiche che lo rendono il monofilo migliore per il long-cast. Usiamo due diverse misurazioni per il carico di rottura, il primo viene misurato con specifiche macchine di precisione, il secondo viene misurato in fase di pesca con attrezzatura specifica. I dati possono avere variazione in base a umidità, temperatura, esposizione alla luce.

Exclusive monofilament of the latest generation. The triple treatment of the synthetic resins enhanced with fixed microfibres and the fluorocarbon outer coating guarantee great smoothness and durability. Its total absence of memory, high degree of abrasion resistance, low water absorption and high resistance to knotting are the characteristics that make it the best monofilament for long casting. We use two different measurements for breaking load. The first uses specific precision machines, while the second is measured when fishing with specific equipment. Data may vary depending on humidity, temperature and exposure to light.

Monofilo creato per la pesca in mare, ideale per il surf-casting e per la pesca dalla barca. Il triplo trattamento di resine sintetiche addizionate con microfibre specifiche ne favoriscono la grande scorrevolezza e la durata. Il colore arancio conferisce un'elevata visibilità, requisito importante per la pesca notturna. Basso allungamento, alta resistenza all'abrasione, assenza di memoria, alta resistenza alla trazione sono le caratteristiche essenziali per un monofilo da long-cast. Usiamo due diverse misurazioni per il carico di rottura, il primo viene misurato con specifiche macchine di precisione, il secondo viene misurato in fase di Pesca con attrezzatura specifica. I dati possono avere variazione in base a umidità, temperatura, esposizione alla luce.

Monofilament designed for sea fishing. Ideal for surfcasting and boat fishing. The triple treatment of the synthetic resins enhanced with specific microfibres guarantees great smoothness and durability. The orange colour provides high visibility, an important requirement while fishing at night. Low stretch, high resistance to abrasion, no memory and high tensile strength are the essential characteristics of a long-cast monofilament.
We use two different measurements for breaking load. The first uses specific precision machines, while the second is measured when fishing with specific equipment. Data may vary depending on humidity, temperature and exposure to light.

Esclusivo monofilo di ultima generazione realizzato con una tecnologia che utilizza tre molecole di alta qualità. Grazie alla combinazione di questi tre elementi si ottiene un prodotto con altissima resistenza all'abrasione. Il rivestimento in fluorine trasmette una grandissima impermeabilità che gli consente di mantenere tutta la propria forza anche da bagnato. Questo monofilo di lunga durata ha, inoltre, una grande scorrevolezza, alti carichi di rottura, assenza di memoria, eccellente resistenza all'abrasione, grande tenuta al nodo. Questo monofilo ha l'aggiunta della fluorescenza grazie alla quale alla luce del sole varia colore. Usiamo due diverse misurazioni per il carico di rottura, il primo viene misurato con specifiche macchine di precisione, il secondo viene misurato in fase di Pesca con attrezzatura specifica. I dati possono variare in base a umidità, temperatura, esposizione alla luce.

Exclusive latest generation monofilament made with a technology that uses three high quality molecules. Their combination makes a product with extremely high resistance to abrasion. The fluorine coating provides great waterproofing which allows it to maintain all its strength even when wet. This long-lasting monofilament also has great smoothness, high breaking loads, no memory, excellent abrasion resistance, great knot strength. This monofilament has the addition of fluorescence thanks to which it changes colour in the sunlight. We use two different measurements for the breaking load, the first is measured with specific precision machines, the second is measured during fishing with specific equipment. The data can vary based on humidity, temperature, exposure to light.

È stato progettato per pesche dove occorre avere un monofilo affondante. Le resine sintetiche che lo rivestono sono esenti da solventi e addizionate con microfibre specifiche che ne favoriscono l'affondabilità, la scorrevolezza e la durata. Il basso allungamento, l'assenza di memoria, l'alta resistenza all'abrasione, la grande tenuta al nodo, l'alta resistenza alla trazione e, ovviamente, l'alto grado di affondabilità, lo rendono il migliore in assoluto per la pesca match. Usiamo due diverse misurazioni per il carico di rottura, il primo viene misurato con specifiche macchine di precisione, il secondo viene misurato in fase di pesca con attrezzatura specifica. I dati possono variare in base a umidità, temperatura, esposizione alla luce.

Designed for fishing where a sinking monofilament is needed. The synthetic resins coating it are solvent-free and ENRICHED Fortified with specific microfibres that enhance its sinkability, smoothness and durability. Its low stretch, lack of memory, high resistance to abrasion, high resistance to knotting, high tensile strength and, of course, high sinkability make it the absolute best solution for match fishing. We use two different measurements for breaking load. The first uses specific precision machines, while the second is measured when fishing with specific equipment. Data may vary depending on humidity, temperature and exposure to light.

Speciale monofilo di ultima generazione ideato per la pesca a feeder. Le resine sintetiche che lo rivestono sono esenti da solventi ed addizionate con microfibre pesanti che lo rendono super affondante, proprietà essenziale per un monofilo da feeder. Il bassissimo allungamento, l'alta resistenza all'abrasione, l'assenza di memoria, l'alta resistenza alla trazione e, ovviamente, l'alto grado di affondabilità lo rendono il monofilo migliore in assoluto per questo tipo di tecnica. Usiamo due diverse misurazioni per il carico di rottura, il primo viene misurato con specifiche macchine di precisione, il secondo viene misurato in fase di pesca con attrezzatura specifica. I dati possono variare in base a umidità, temperatura, esposizione alla luce.

Special latest generation monofilament designed for feeder fishing. The synthetic resins coating it are solvent-free and enhanced with heavy microfibres that make it super sinking, an essential property for a feeder monofilament. Its very low stretch, high resistance to abrasion, lack of memory, high tensile strength and, of course, high sinkability make it the absolute best monofilament for this type of technique. We use two different measurements for breaking load. The first uses specific precision machines, while the second is measured when fishing with specific equipment. Data may vary depending on humidity, temperature and exposure to light.

Monofilo super affondante di alta qualità per la pesca a Method/Feeder. I coopolimeri di nylon di ultima generazione di cui è composto gli consentono di avere un'eccellente affondabilità e di tagliare più rapidamente la superficie dell'acqua. Questo monofilo ha, inoltre, una grande scorrevolezza e durata, alti carichi di rottura, grande impermeabilità, eccellente resistenza all'abrasione, grande tenuta al nodo e alta resistenza alla trazione. Usiamo due diverse misurazioni per il carico di rottura, il primo viene misurato con specifiche macchine di precisione, il secondo viene misurato in fase di pesca con attrezzatura specifica. I dati possono avere variazione in base a umidità, temperatura, esposizione alla luce.

High quality extra sinking monofilament for Method/Feeder fishing. The latest generation of nylon copolymers allows an excellent sinkability and the capacity to cut the surface of the water more quickly. This monofilament also has great fluency and durability, high breaking loads, great impermeability, excellent abrasion resistance, great knot strength and high tensile strength. We use two different measurements for the breaking load, the first is measured with specific precision machines, the second is measured during fishing with specific equipment. The data can vary based on humidity, temperature, exposure to light.

Speciale monofilo multicolor a quattro colori di ultima generazione progettato per il surf-casting e per il bolentino. Questo morbido monofilo ad alta visibilità è realizzato con una tecnologia che utilizza tre molecole di alta qualità: nylon, rivestimento in fluorine e rivestimento in silicone. Grazie alla combinazione di questi tre elementi si ottiene un prodotto con altissima resistenza all'abrasione, grandissima impermeabilità e capacità di mantenere tutta la propria forza anche da bagnato. Perfetto per lanci a lunga distanza, ha assenza di memoria, grande resistenza ai nodi e nessuna variazione dei carichi di rottura in acqua. Il monofilo viene proposto con quattro colori HI VISIBILITY che si alternano ogni 25 mt. (CRYSTAL - BLU - GIALLO- ROSSO). Usiamo due diverse misurazioni per il carico di rottura, il primo viene misurato con specifiche macchine di precisione, il secondo viene misurato in fase di Pesca con attrezzatura specifica. I dati possono variare in base a umidità, temperatura, esposizione alla luce.

Special four colour monofilament of latest generation designed for surf-casting and "bolentino" fishing. soft and high-visibility monofilament is made with a technology that uses three high-quality molecules: nylon, fluorine coating and silicone coating. The combination of these three elements creates a product with extreme high resistance to abrasion, great waterproofness and the ability to maintain all its strength even when wet. Perfect for long distance casting, it has no memory, great knot strength and no variation in breaking loads in water. The monofilament is offered with four HI VISIBILITY colours that alternate every 25 metres (CRYSTAL - BLUE - YELLOW - RED) We use two different measurements for the breaking load, the first is measured with specific precision machines, the second is measured during fishing with specific equipment. The data can vary based on humidity, temperature, exposure to light.

STEEL RESISTANCE

150m 300m NXGEN FLUOTEC NX80 NYLON

- SPECIAL REEL
- HIGH KNOT RESISTANCE
- WATER REPELLENT
- LOW STRETCH
- U.V. PROTECTION TRIPLE TREATMENT
- ABRASION RESISTANCE
- SUPER STRONG HIGH RESISTANCE

Le summum en matière de combinaison entre versatilité et qualité, sans aucun compromis. Une affirmation de ce genre peut sembler être une contradiction, mais le NXGEN FLUOTEC combiné avec des matériaux d'une qualité sans pareille lui confèrent des excellentes caractéristiques. Résistance à l'usure, résistance au nœud, absence de mémoire. Ce fil est idéal soit pour être mis en bobine, soit pour tous les genres d'utilisation. Une qualité supérieure est une nécessité fondamentale.

El máximo en calidad y versatilidad sin compromisos. El FLUOTEC NXGEN combinado con materiales de prima calidade le dan caracteristicas excelentes. Resistencia a la abrasión y al nudo, sin memoria mecánica. Es un hilo Top para bobinar carretes y para todo tipos de pesca en los que hace falta una calidad TOP.

Il top line da usare come lenza madre nel match fishing, sviluppato da Jacopo Falsini e il Team Colmic per la competizione e commercializzato da Colmic per soddisfare le necessità dei pescatori più esigenti. Questo monofilo coniuga il polimero NXGEN con i materiali top quality usati nell'agonismo. Il risultato è il filo più indicato per match fishing e fishery.

This premier line developed by Jacopo Falsini and the Colmic team is best used as a main line in match fishing. Designed for competition, it is marketed by Colmic in order to satisfy the most demanding of anglers. This monofilament combines the NXGEN polymer with top quality. The result being the most specific nylon for match fishing and commercial fisheries.

Spray Leader è il monofilo NXGEN ideato per essere impiegato come terminale nel big game, ma adatto per tutte le specialità di pesca in mare e acqua dolce. Resistenza all'abrasione, morbidezza, bassa elasticità, e grande tenuta sul nodo e sulla trazione sono le caratteristiche che permettono di impiegare questo fantastico Nylon nella traina, nel jigging, nello spinning nella pesca al siluro, allo storione, alle carpe, etc.... La speciale confezione ad astuccio circolare facilita il pescatore nel riporre e conservare il prodotto.

The Spray Leader is a NX Gen line monofilament expressly designed for hook lenghts and shock leaders in big game fishing. Abrasion resistance, softness, low stretch, excellent knot strenght are the main features of this line, making it perfectly suitable for trolling, jigging and spinning. Conveniently packaged in a special large arbour spool.

L'X5000 è un monofilo clear, sottoposto ad un particolare trattamento "fluorine process" e si presta ad esser utilizzato nelle più svariate circostanze tecniche, e di pesca. Validissimo per il mulinello nello spinning, la bolognese, la trota lago ed il surfcasting, ma ottimo anche per la realizzazione di lenze per la pesca al colpo, per travi da surf casting e da bolentino. Un nylon universale, di qualità superiore.

The X5000 is a "clear" monofilament treated with the special "fluorine process" and is suitable for the most varied of technical circumstances and fishing styles. A great line on the reel for spinning, bolognese, lake trout, and surfcasting, but just as good for constructing lines for coarse fishing, for surfcasting, and for rod trolling. A superior-quality, universal nylon.

Monofilo giapponese. Un doppio trattamento di siliconatura lo rende inattaccabile da agenti esterni, aumentandone la resistenza all'abrasione e la scorrevolezza. Il FORMER EVOLUTION è particolarmente indicato per la pesca in passata con la bolognese, per la pesca della carpa, del siluro e per tutte le discipline di pesca in mare.

Japanese monofilament. A double silicon treatment makes it untouchable by external agents and very easy-running while increasing its abrasion resistance. FORMER EVOLUTION is particularly suitable for trotting with the bolognese rod, for carp and catfish fishing, and for all the sea-fishing specialties.

FENDREEL

150m 300m NYLON

MADE IN JAPAN

Questo nylon Giapponese è un prodotto eccezionale per la pesca con canne a mulinello. Grazie alla sua completa assenza di memoria meccanica, evita il formarsi di qualsiasi tipo di spira in fase d'imbobinamento.

This Japanese nylon is an exceptional line for rod-and-reel fishing. Thanks to its absolute lack of line memory, it forms no coils of any type - thus eliminating line twists - as it comes off the spool for reel loading.

Questo eccezionale monofilo é stato studiato appositamente per la pesca all'inglese e tutte le pesche dove necessitano di un nylon affondante. Il basso allungamento, un alta resistenza all'abrasione, una bassa memoria meccanica, una bobinatura a spire parallele antitorsione, un particolare processo di stiratura, rendono l'ARWEN INGLESE, un nylon specifico davvero unico sul mercato.

This exceptional monofilament is specially designed for match fishing: low stretch factor, high abrasion resistance, low mechanical memory, anti-twist parallel winding, a special pre-stretching process. All these features make ARWEN INGLESE a specific nylon line without equal on the market.

RBS

100m NYLON

MADE IN JAPAN

Monofilo giapponese alta tenacità al nodo. Allungamento medio e resistentissimo all'abrasione. I pallini di piombo anche molto duri, non intaccano minimamente questo filo e possono essere spostati più volte lasciando la lenza inalterata.

A memory-free Japanese monofilament, very high knot strength and incredible resistance to abrasion. On this monofilament, you can move the lead sinkers, even the hardest, any number of times without nicking the line in the least.

Questo monofilo di colore celeste risulta morbido e scorrevole. La sua resistenza al nodo e alla trazione è molto elevata. Ottimo sia in acque dolci che per la pesca in mare.

This grey-blue color monofilament is very supple and easy-running. Its knot strength and traction resistance is also very high. A fine choice for both fresh and salt water uses.

Questi due nylon nei colori rosso e giallo fluorescenti li rendono ben visibili in ogni situazione di luce, mentre al contrario, si affievoliscono fino quasi all'invisibilità, una volta immersi in acqua. Grazie al particolare processo di siliconatura, consente una veloce realizzazione di nodi praticamente perfetti, anche nei suoi diametri più grandi. Un'altra caratteristica unica di questo rivoluzionario nylon, è quella di rimanere incredibilmente lineare e morbido, anche dopo lunghi periodi di utilizzo.

The red and yellow fluorescent colors make these two nylons clearly visible in all light conditions while at the same time they become almost invisible, once in the water. A special silicon-coating process, permits a rapid creation of perfect knots, even in the largest diameters. This revolutionary nylon remains linear and incredibly soft, even after long period of use.

Questo nylon conico, è stato ideato appositamente per la congiunzione tra una lenza madre sottile ed uno spezzone di diametro maggiore, utile a reggere lo strappo del lancio. Il colore CLEAR, evita che quei riflessi prodotti in acqua da equivalenti shock colorati, possano essere motivo dei noti attacchi da parte del pesce serra.

This conically-tapered nylon is designed especially for the combination of a thin-section main line and a length of greater diameter, appropriate for resisting the shock factor of the cast. The CLEAR color obviates the reflections produced in the water by equivalent colored shocks, which can be the cause of the attacks on lines by tailor fish.

Lo SPOT TAPERED è stato sottoposto ad uno speciale trattamento ai siliconi, il quale oltre che a favorire la fuoriuscita delle spire in fase di lancio, lo protegge dall'azione corrosiva della salsedine. Il suo diametro si mantiene costante per 200 mt, per poi variare negli ultimi 20 mt finali. Questo lo rende molto simile ad uno schock leader, con la differenza che non sussiste alcun nodo di giunzione tra i due differenti diametri. Validissimo per tutte le tecniche di long cast, sia d'acqua dolce che d'acqua salata.

The SPOT TAPERED line is given a special silicon treatment that not only ensures that the line coils come smoothly off the reel during casting but also protects the line from the corrosive action of salt. The diameter is constant for 200 meters and varies in the last 20 meters. This makes the line very similar to a shock leader fitted rig, with the difference that there is no junction between the two different diameters. Great for all long casting techniques, in both fresh and salt water.

L'abbinamento naturale di fibre innovative e polimeri all'avanguardia ottimizzano le caratteristiche fisico chimiche di ogni componente donando alta resistenza al nodo(HIGH KNOT RESISTANCE). La geometria di trecciatura ed il mix di resine impiegate assorbono la tensione durante il combattimento col pesce (SHOCK ABSORBER), pur mantenendo la massima sensibilità all'abboccata (SUPER SENSITIVE). Questo Braid risulta incredibilmente rotondo e setolo (SILK TOUCH). La policromia con mark a cadenze regolari (MULTICOLOR) amplifica la percezione della quantità di lenza utilizzata sia dopo il lancio che in fase di recupero.

The natural combination of innovative fibres and state-of-the-art polymers optimises the physical and chemical characteristics of each component to give high knot resistance. The braiding geometry and mix of resins used absorb the tension during the struggle with the fish (SHOCK ABSORBER), while maintaining maximum sensitivity to the bite (SUPER SENSITIVE). This braid is incredibly rounded and silky (SILK TOUCH). Polychromy with regular markings (MULTICOLOURED) increases perception of the amount of line used both after casting and during retrieval.

BALLS BEARINGS

Mulinello dotato di N cuscinetti +1 particolarmente strutturato per l' antiritorno infinito, tutti in acciaio INOX schermati sulle due facce per rallentarne la corrosione e allungarne la vita.

The reel is equipped with "N balls bearings +1 for anti-reverse, they are all stainless steel and shielded on both sides to slow down corrosion while making it more long-lasting.

Moulinet équipé de roulements N +1 particulièrement structuré pour un antidévireur infini, le tout en acier inoxydable blindé des deux côtés pour ralentir la corrosion et prolonger sa durée de vie.

Carrete equipado con cojinetes N +1 especialmente estructurados para un antirretroceso infinito, todo en acero inoxidable blindado en ambos lados para retardar la corrosión y alargar su vida.

NAIL BAIL HOLDER

Guidafilo disegnato per aiutare e guidare al massimo il filo nella fase di recupero. La forma ad unghia permette al filo di scivolare molto più velocemente e senza pericolose torsioni all'interno del guidafilo, normalmente dotato di cuscinetto a sfera.

New concept line roller, designed to help and lead the line during the retrieve. The special nail shape allows the line to slide much faster and without dangerous torsions inside the line roller, normally provided of a ball bearing.

Galet de pick up dessiné pour aider et guider le fil dans la phase de recouvrement. La forme à l'ongle permet au fil de glisser beaucoup plus rapidement et sans torsions dangereuses à l'intérieur du guide fil, normalement doué de roulement a bille.

Puerta guia hilo dibujado para ayudar y conducir el hilo en la fase de recuperación. La forma a uña permite al hilo de resbalar mucho más velozmente y sin peligrosas torsiones dentro del guia hilo, normalmente dotado de rodamiento.

DRAG CARBON WASHER

I dischi in carbonio e alluminio determinano leggerezza e minore attrito, permettendo l'utilizzo di terminali in nylon sottilissimi anche in combattimenti con prede importanti.

The carbon and aluminium discs mean lightweight and reduced friction. As a result, even the thinnest nylon lines can be used, even in tussles with powerful fish.

Pour moulinets de niveau élevé sont utilisés des disques en carbone, qui déterminent des frottements mineurs, une légèreté majeure et une durée certainement supérieure.

Los discos de fricción de carbono favorecen además una regulación mucho más precisa del embrague, se consigue producir una mayor frenada o un mayor desplazamiento de la bobina.

KNURLING

La zigrinatura realizzata nel centro della bobina "knurlin system" previene lo slittamento dei fili trecciati in fase di imbobinatura.

The knurling system present in the spool's core prevents any slipping of braided lines during the spooling phase.

Le moletage réalisé au centre de la bobine "knurlin system" évite le glissement des tresses lors de la phase de bobinage.

El "knurlin system" presente en el núcleo del carrete evita cualquier deslizamiento de las líneas trenzadas durante la fase de enrollado.

POWER LINE ROLLER ANTI-TWIST

Il rullino scorrifilo ben costruito sia nel materiale che nel profilo, permette di preservare il monofilo per lungo tempo e evita possibili parrucche in fase di recupero.

A well made line roller, in terms of material and shape, allows to keep the line qualities performing for a longer time and avoid any eventual line tangles during the retrieve.

Le guide fil est un des points les plus critiques dans un tourbillon et il est presque toujours peu considéré. Permet de préserver le fil pour long temps et il évite possible vrillages en phase de recouvrement.

El guía hilo es uno de los punto s más críticos en un remolino y casi siempre es algo considerado. Permite de preservar el hilo por largo tiempo y evita posibles problemas en fase de recuperación.

WSM WORM SHAFT MECHANISM

Il saliscendi della bobina è comandato da un pignone con disegno a coclea (Spiraliforme) , in modo da ridurre al minimo gli attriti e da rendere tutto il meccanismo il più solidale possibile. Grazie al Worm Shaft la sequenza di avvolgimento avviene in maniera fluida e rende più agevole sia il recupero che l'azione della frizione.

The in and out movement of the reel is governed by a pinion with a Spiral design in order to reduce the friction to the minimum and to make the mechanism as integral as possible. Thanks to the Worm Shaft, the winding sequence happens in a fluid manner and makes the recovery as well as the brake action less demanding.

Le est le coeur d'un bon moulinet. Et sur cet bout que tous les efforts sont déchargés et il est ce bout qu'il donne la douceur du recouvrement. Ensuite pour une partie si importante sur tous notre meilleurs modèles ont été montés pignons en bronze, irréprochable de la rouille et avec une grande capacité de résistance.

Gracias al Worm Shaft la secuencia de bobinado se realiza de manera fluida y son más fáciles tanto la recuperación como la acción del embrague. Con este sistema, las oscilaciones de la bobina son casi nulas y el nylon es bobinado en la bobina con una secuencia de espiras paralelas, con la tensión adecuada y sin torsiones especiales.

BRASS PINION GEAR

Su questo componente vengono scaricati tutti gli sforzi ed è questo pezzo che dà la fluidità e la morbidezza del recupero. Quindi per una parte così importante su tutti i nostri migliori modelli sono stati montati pignoni in bronzo, inattaccabile dalla ruggine e con una grande capacità di resistenza.

Is on this particular gear that all the stress and strains are supported and it is this gear that also gives the smoothness of the retrieve. For such an important part we could not avoid to use, for our top of the range models, bronze pinions, untouchable by the rust and with a great resistance to the wear.

Tous les efforts se déchargent sur ce composant et c'est cette pièce qui donne la fluidité et la douceur de la reprise. Ainsi pour une pièce aussi importante tous nos meilleurs modèles ont été montés avec des pignons en bronze, résistants à la rouille et avec une grande capacité de résistance.

Todos los esfuerzos se descargan en este componente y es esta pieza la que da la fluidez y la suavidad de la recuperación. Así que para una pieza tan importante todos nuestros mejores modelos han montado piñones de bronce, resistentes al óxido y con una gran capacidad de resistencia.

SOFT DAMPING LINE CLIPS

Sistema di bloccaggio supportato da molla interna e rivestimento plastico. La prima caratteristica consente di ammortizzare lo shock dovuto al lancio e la seconda protegge il nylon dall'usura per sfregamento.

Locking system supported by internal spring and plastic coating. The first feature allows to absorb the shock due to the launch and the second protects the nylon from wear due to rubbing.

Système de verrouillage avec ressort interne et revêtement plastique. Le premier permet d'amortir le choc dû au lancement et le second protège le nylon de l'usure due au frottement.

Sistema de bloqueo apoyado por resorte interno y revestimiento plástico. La primera característica permite absorber el impacto debido al lanzamiento y la segunda protege el nailon del desgaste por roce.

PARALLEL WINDING SYSTEM

Il parallel winding system permette imbobinatura perfetta delle spire di nylon per un rilascio sempre fluido che consente lanci lunghi e precisi. Mantiene i moderni fili con assenza di memoria nella stessa qualità con cui sono imbobinati in origine.

The parallel winding system allows for a perfect spooling of nylon spirals, for an ever-smooth release which enables long and precise casting. It keeps modern memoryless threads in the same quality they were originally spooled with.

Avec ce système, les oscillations de la bobine sont quasiment nulles et le nylon est enroulé sur la bobine avec une séquence à spires parallèles, avec la bonne tension et sans torsions particulières.

El sistema de enrollado paralelo permite un enrollado perfecto de las espirales de nailon, para una liberación siempre suave que permite un lance largo y preciso. Mantiene los subprocesos sin memoria modernos con la misma calidad con la que se colocaron originalmente.

SALTWATER PROTECTION

Tutti i mulinelli Colmic caratterizzati da questa sigla, sono stati sottoposti ad un particolare trattamento anti corrosione, il quale oltre che a prevenire l'ossido, rende praticamente inattaccabili dalla salsedine i meccanismi interni del mulinello.

All the Colmic reels featuring these initials have been subjected to a special rustproofing treatment which, as well as preventing oxidation also keeps the internal mechanisms of the reel practically intact from corrosion deriving from the action of salt water.

Tous les moulinets Colmic caractérisés par ce sigle ont été soumis à un traitement anticorrosion spécial, qui non seulement prévient l'oxydation mais rend pratiquement inattaquables par le sel marin les mécanismes internes du moulinet.

Todos los carretes Colmic SALT WATHER, han sido sometidos a un especial tratamiento anti corrosiòn, el cual previene el oxido, y no se pega la sal de mar en la parte interna del carrete. Esta sigla, es sinonimo de ulterior calidad en cuanto a nuestros productos destinados al agua de mar.

COMPUTER BALACED ROTOR

Il bilanciamento della bobina è fondamentale per evitare vibrazioni nel recupero. La rotazione generata durante la fase di recupero, specialmente se ad alta velocità, viene esaminata da un sistema computerizzato che provvede ad indicare in quale punto del rotore bisogna intervenire per bilanciare ed equilibrare.

The rotation generated during the retrieve, especially if it is a high speed ratio, is monitored by a computer system that gives the indication where is the precise point in which must be added a weight to balance and make equilibrate the spool.

Le balancement de la bobine est fondamental pour éviter vibrations dans le recouvrement. La rotation issue pendant la phase de recouvrement, spécialement si à la haute vitesse, elle est examinée par un système informatisé qui pourvoit à indiquer en lequel point du rotor il faut intervenir pour balancer et équilibrer, justement comme il se fait dans les roues d'une voiture.

La subida y bajada de la bobina está controlada por un piñón con diseño en tornillo sinfín (espiral), con el fin de reducir al mínimo los rozamientos y hacer que todo el mecanismo sea lo más sólido posible.

ONE WAY ANTI-REVERSE

OneWay System è un sistema di antiritorno infinito, dove lo sbloccaggio è determinato dal disinserimento di un cuscinetto a rulli unidirezionale che appunto sblocca il rotore. Tale procedura avviene tramite una levetta posta generalmente sopra o sotto il corpo mulinello. Quando il meccanismo è inserito il cuscinetto è sempre in presa diretta sulla meccanica e quindi sulla manovella.

The One Way System is an infinite backstop system, where blocking is determined by the disconnection of a uni-directional roller bearing which unblocks the rotor. This procedure is actioned by a small lever normally positioned above or below the body of the reel. When the mechanism is inserted, the bearing is always directly engaged on the mechanism and, therefore, on the crank.

L'One Way System est un système d'anti-retour infini, où le déverrouillage est déterminé par le décrochage d'un palier à rouleaux unidirectionnel qui débloque donc le rotor. Cette procédure est réalisée au moyen d'un levier situé généralement au-dessus et en-dessous du corps du moulinet. Lorsque le mécanisme est activé, le palier est toujours en prise directe sur la mécanique et donc sur la manivelle.

El One Way System es un sistema de antirreverso infinito, donde el desbloqueo se produce por la desconexión de un rodamiento de rodillos unidireccional que precisamente desbloquea el rotor. Cuando el mecanismo está conectado el rodamiento está siempre en toma directa sobre la mecánica y por tanto sobre la manivela.

CNC HANDLE

Queste manovelle garantiscono una durata infinita, una grande robustezza ma con un peso molto ridotto. Usate normalmente su mulinelli di grande potenza e destinati ad un uso con prede impegnative.

These handles have been developed and tooled by a solid piece of aluminium, that ensures an everlasting life, a great strength but with a very light weight. Are normally used on big power reels aimed for the use with important preys.

Le procédé CNC est fourni par un tour avec contrôle numérique de la coupe, donc extrêmement précis. Ils sont utilisé normalement sur moulinets de grande puissance et destinés à un usage avec des proies importantes.

El procedimiento CNC es provisto por un torno con control numérico del corte, por lo tanto extremadamente preciso. Usadas normalmente sobre carretes de gran potencia y destinados a un empleo con presas grandes.

DAYTONA DR - DL

9+1

- Hardened aluminium block body
- Cold-forged aluminium spool and side discs
- Technologically designed cogs for high precision and robustness
- Anti-corrosion stainless steel double shielded ball bearings
- Micrometric drag with oversized discs
- FSA (full surface anodising): anodising surface treatment across the whole reel
- Daytona DR: crank on the right with an aluminium knob
- Daytona DL: crank on the left with an Eva knob
- Protective neoprene case with Velcro fastener

NEW SEAT BOXES 2025 - MADE IN ITALY

NEW 2025

Linea di panieri a 4 gambe da Ø36mm dotati di una stabilità eccellente che garantisce al tempo stesso una velocità estrema di posizionamento su qualunque tipo di terreno. La gamba di Ø36mm rimane fissa sulla struttura della pedana ed è solo il suo interno telescopico a muoversi una volta sbloccato il pomello. Il piede in alluminio garantisce una salda presa anche su pietre e piani molto inclinati in cemento spesso, scivolosi per piedi in materiale plastico. Le livelle di riferimento assicurano di posizionare il panchetto correttamente e la comodissima seduta ergonomica Foam ultra light dona un'incredibile comfort durante l'azione di pesca. Un look accattivante con un desing studiato per avere la massima solidità evitando allo stesso tempo i pesi in eccesso.

A line of 4-leg Ø36mm seatboxes with excellent stability that guarantees extreme speed in placing the seatbox on any kind of ground. The Ø36mm leg remains fixed on the structure of the seatbox and it is only the telescopic leg inside that moves once the knob is released. The aluminium foot guarantees a firm grip even on stones and very sloping surfaces that are often slippery for plastic feet. Bubble levels ensure to position the seatbox correctly and the ultra light Foam ergonomic seat provides incredible comfort during fishing. An appealing look designed for maximum solidity but avoiding extra weight.

BLACK MONSTER | MASTER SERIES

CODE	KG	BARCODE
PCMS04	1 Kg	8 033312 197597

Pastura a grana media con un potere legante medio, dopo la bagnatura si presenta con un colore nero. Questa pastura, grazie alle sue farine di altissima qualità unite ad aromi microincapsulati selezionati, sprigiona un intenso sapore attrattivo gradito moltissimo a Breme, Gardon tutti i ciprinidi in generale. Questa Pastura si può impiegare tutto l'anno; è ottima per canali e acque con correnti medio veloci. Può essere utilizzata pura, oppure tagliata con della terra quando si aggiunge il fouilles. La bagnatura è semplice e può essere combinata con altre pasture.

Medium grain groundbait with medium clumping power, when wet it takes a black colour. This groundbait, thanks to the highest quality of its flours and selected micro-encapsulated flavours, releases a strong attractive scent especially appreciated by Bream, Gardon and all Cyprinids in general. This groundbait can be used all year long; it is excellent for canals and medium-fast running water. Can be used alone, or mixed with sand when adding jokers. Easy to wet and can be combined with other types of bait.

XTREME MATCH | MASTER SERIES

CODE	KG	BARCODE
PCMS01	1 Kg	8 033312 159076

Pastura a grana media con un potere legante medio, dopo la bagnatura si presenta con un colore nocciola scuro. Questa Pastura si può impiegare tutto l'anno; è ottima per canali e acque con correnti medio veloci. Può essere utilizzata pura, oppure tagliata con della terra quando si aggiunge il fouilles. La bagnatura è semplice e può essere combinata con altre pasture.

Medium grain groundbait with medium clumping power, when wet it takes a dark hazel colour. This groundbait, thanks to the highest quality of its flours and selected micro-encapsulated flavours, releases a strong attractive scent especially appreciated by Bream, Gardon and all Cyprinids in general. This groundbait can be used all year long; it is excellent for canals and medium-fast running water. Can be used alone, or mixed with sand when adding jokers. Easy to wet and can be combined with other types of bait.

IMPRESSIVE MIX | MASTER SERIES

CODE	KG	BARCODE
PCMS02	1 Kg	8 033312 159083

Pastura studiata per la pesca di Breme e Gardon. Come per tutta la gamma Master Series, sono state impiegate solo delle farine di prima scelta e aromi naturali di altissima qualità. Questa pastura può essere tagliata con della terra in qualsiasi percentuale è la pastura ideale per pesche difficili quando è consentito l'utilizzo di fouilles in pastura ed il ver de vase per innesco.

Ground bait created for Bream and Gardon angling competitions. As for each item of the Master Series range, only first choice flours and the highest quality natural flavourings were selected. This groundbait can be mixed with any percentage of sand, it is the ideal groundbait for difficult angling when the use of joker in chumming and hooking bloodworms are allowed.

MATCH WINNER | MASTER SERIES

CODE	KG	BARCODE
PCMS03	1 Kg	8 033312 159090

Pastura a grana medio grossa, molto efficace nella pesca a tutti i Ciprinidi. Ha un sapore dolce speziato al caramello, un ottimo potere legante e grazie alla sua tenacità può essere arricchita con esche vive, specialmente se si pesca con Bigattini, Casters e Lombrichi. E' una pastura ideale quando la pescosità è molto elevata ed occorre selezionare la taglia.

Medium-coarse grain groundbait, very effective for all Cyprinids family. It has a sweet spicy caramel taste, excellent clumping and thanks to its tenacity it can be enriched with life bait, especially while fishing with maggots, casters and earthworms. It is an ideal groundbait when angling in abundance of fish and one need to make choices based on size.

FEEDER ALLROUND | MASTER SERIES

CODE	KG	BARCODE
PCMSF02	1 Kg	8 033312 159113

Pastura specifica per la pesca a Feeder di colore giallino naturale. È una pastura che attira tutti i ciprinidi, specialmente le grosse Breme, grazie alla selezione di farine pesanti che non si disperdano sul fondo e restano vicinissimi al pasturatore proprio dove resta l'esca. E' una pastura tutto fare; si consiglia di impiegarla dove il pesce non è abituato agli aromi quando preferisce una pastura naturale. L'aggiunta di esche aumenterà il suo forte potere attrattivo. E' sempre consigliabile di passare tutto al setaccio.

Specific groundbait for feeder fishing of natural yellow color. It is a groundbait that attracts all cyprinids, especially the large Brimas, the selection of heavy flours that do not disperse on the bottom and remain very close to the feeder. It is a do-it-yourself pasture; it is advisable to use it where the fish is not used to aromas when it prefers a natural groundbait. The addition of bait will increase its strong attractive power. It is always advisable to pass everything through a sieve.

MONSTER CARASSIO | ATOMIC BAITS

CODE	KG	BARCODE
PC810	1 Kg	8 033312 234865

Pastura granulometria medio sottile, con un potere legante medio. Ha un colore nocciola ed un aroma al caramello e vaniglia. E' stata messa a punto per le pesche in canale a carassi e carpe di taglia medio-piccola.

Groundbait with medium-fine grain, with medium binding power. Hazelnut color and caramel and vanilla fragrance. It has been developed for fishing for crucians and medium-small carp in canals.

PREMIER CARPA CARASSIO EVOLUTION | ATOMIC BAITS

CODE	KG	BARCODE
PCBEL03E	1 Kg	8 033312 124814

Pastura a grana medio grossa, di colore giallo vivo, con potere legante e con sapore ed odore molto dolce, può essere usata benissimo sia in acque veloci che molto lente. E' ideale per la pesca di tutti i pesci di fondo ed in particolare carassi e carpe.

Medium-large grained ground bait, yellow colored. Good binding power and very sweet taste, it can be used effectively both in running and still waters. It's the ideal for bottom fishing, especially for carps and crucians.

MB 300 CARPA CARASSIO BREAM | ATOMIC BAITS

CODE	KG	BARCODE
PCBEL03B	1 Kg	8 033312 124791

Pastura a grana medio fine, di colore ambrato chiaro, leggermente legante, è ideale per la pesca di breme e carassi di media taglia in lago, in canali con acqua ferma oppure in acque con poca corrente.

Medium-fine grained ground bait, light amber color, slightly binding, it's the perfect ground bait for fishing bream at lake, canals both in still and moderately running water.

MB 500 CARPA CARASSIO BREAM | ATOMIC BAITS

CODE	KG	BARCODE
PCBEL03C	1 Kg	8 033312 124807

Pastura da fondo a grana grossa, di colore marrone scuro, odore e sapore molto dolce, grande potere legante. Ottimo per l' aggiunta di esche vive oppure mais e canapa. Usata per la pesca di carpe breme o carassi in acque veloci e medio veloci. Se vogliamo usarla in acque con poca corrente, oppure ferme aggiungere il 20% di torteaux di mais.

Large grained bottom ground bait, deep brown color, very sweet smell. For it's great binding power it can be integrated with alive baits, corn and hemp. Really good for bream and crucian fishing in rapidly running waters. Instead to deploy all the potential of this ground bait in still or slow flowing waters you should add a 20% of torteaux corn.

KARPER EVOLUTION | ATOMIC BAITS

CODE	KG	BARCODE
PCBEL03A	1 Kg	8 033312 124784

Pastura a grana medio grossa, di colore ambrato, odore e sapore di miele, ottimo potere legante. Grazie alla sua tenacità può essere arricchita di esche vive oppure mais e canapa. Ha un potere attirante eccezionale nella pesca delle grosse carpe.

Medium – large grained ground bait, amber-colored, sweet honey smell, witha great binding power. It can be mixed with alive baits, boiled corn or hemp. We added to this already superb ground bait our "TOP SECRET" ingredient same as Champion Feed, which gives it an impressive attracting power, especially for the big carps.

BIG FISH YELLOW EVOLUTION | ATOMIC BAITS

CODE	KG	BARCODE
PCBEL03F	1 Kg	8 033312 124821

Pastura a grana medio grossa, di colore giallo vivo, molto dolce e con grande potere attrattivo. Ideale per la pesca di grossi pesci di fondo sia in acque ferme che medio veloci. In acqua ferma si consiglia di miscelare la pastura con il 15% di torteaux di mais per farla disgregare più velocemente e rendere più veloce il potere attirante.

Medium – large grained ground bait, yellow color, sweet and with a great attracting power. Ideal for fishing big bottom water fish, both in current and still waters. For still waters we recommend to mix up Big Fish Yellow with a 15% of torteaux corn, that will allow a quicker break up, so helping the deploy of all the attracting power of this superb ground bait.

BIG FISH RED EVOLUTION | ATOMIC BAITS

CODE	KG	BARCODE
PCBEL03G	1 Kg	8 033312 124838

Pastura a grana media, di colore rosso, odore e sapore dolce, ha un potere attrattivo molto forte. Questa pastura ha un forte potere legante e può essere arricchita con esche vive come vermi – bigattini oppure con buone quantità di mais e canapa. Ideale per la pesca di tutti i pesci di fondo e in particolare i grossi pesci gatto.

Medium grained ground bait, red color, sweet smell, with a strong attracting power. It features a great binding power and it can be enriched with alive baits, like warms, or also with corn and hemp. Perfect for fishing all the kinds of bottom fish, catfishes in particular.

BLACK EVOLUTION | ATOMIC BAITS

CODE	KG	BARCODE
PCBEL03I	1 Kg	8 033312 124852

Pastura da fondo a grana medio di colore nero. È ideale in acqua ferma e corrente. Ideale per la pesca di peci molto sospettosi, grosse breme, carassi e gardon.

Medium-fine grained bottom ground bait, black colored. It's perfect both for running and still water.

POWER CARP | ATOMIC BAITS

CODE	KG	BARCODE
PC801	1 Kg	8 033312 251930

Pastura a grana medio grossa, di colore ambrato, odore e sapore molto dolce, ottimo potere legante. Grazie alla sua tenacità può essere arricchita di esche vive oppure mais e canapa. Ha un potere attirante eccezionale nella pesca delle grosse carpe.

Medium – large grained ground bait, amber-colored, sweet smell, witha great binding power. It can be mixed with alive baits, boiled corn or hemp. It can be enriched with live bait or corn gives it an impressive attracting power, especially for the big carps.

QUEEN CARPA NX | ATOMIC BAITS

CODE	KG	BARCODE
PC809	1 Kg	8 033312 146199

Pastura da fondo a grana media ideale per la pesca a carpe e carassi di grossa taglia di colore naturale ed aroma di panettone dolce. Ha un potere legante medio e può essere utilizzata sia in acque ferme sia in acque correnti. Può essere integrata con bigattini mais e casters per aumentare il suo forte potere attrattivo.

It's a natural ground bait with a medium grain, it's ideal for the fishing of big size carps and crucians .It has a sweet cake flavor with a medium clumping. It can be used both in still water and in current water. It can be mixed up with corn and casters to increase its attractive power.

ALBORELLA EXTRA GOLD | ATOMIC BAITS

CODE	KG	BARCODE
PC30	1 Kg	8 033312 251947

Pastura da superficie a grana molto fine particolarmente indicata per la pesca d'alborelle in canali o laghi con poca corrente e scarsa ossigenazione. Colore nocciola chiaro ed aroma intenso di crisalide. Questa pastura ha un potere incredibilmente attraente causato da un effetto nuvola molto persistente. Aroma crisalide che prevale sulla lacto vaniglia.

Ultra-fine textured surface groundbait for bleak fishing in slow moving and badly oxygenated canals or lakes. Light hazel colour and strong chrysalis flavour. Produces a long-lasting cloud effect that has an incredible power of attraction. Chrysalis flavour prevailing over milk and vanilla.

BARBO ROSSA | ATOMIC BAITS

CODE	KG	BARCODE
PC807	1 Kg	8 033312 146182

Miscela creata con farine di primissima qualità per la pesca in fiume di colore rosso. Ha una grana media un forte potere legante ed un aroma e sapore di formaggio molto gradito a tutti i ciprinidi. E' particolarmente indicata anche quando le acque non sono molto limpide. E' capace di trasportare sul fondo una buona quantità di esche aggiunte.

It's a red ground bait made of high quality flours suitable for the river fishing. It has a medium grain and a great clumping power with an attractive cheese flavor for the Cyprinids. It's particularly indicated even when the water is not such as clear. This ground bait is able to transport to the bottom other baits as well.

BIANCA | ATOMIC BAITS

CODE	KG	BARCODE
PC300A	3 Kg	8 033312 212733

Pastura ideale per la pesca in fiume di colore naturale. Grana media e buone proprietà leganti, rendono lo sfarinato adatto essere integrato da esche vive e non. Il formato da 3 kg, oltre che essere conveniente, consente un utilizzo di questa pastura anche come base principale, che può essere arricchita a sua volta da aggiunte di ulteriori aromi o altri sfarinati a piacere. Testata anche in prova dai nostri agonisti durante il recente mondiale, come prodotto di supporto, non ha deluso le aspettative.

Ideal groundbait for river fishing in natural color. The medium grain and good binding properties make the flour suitable for supplementing both live and non-live bait. The 3 kg format is not only convenient, but it also allows the bait to be used as a main base which can be enriched by adding further flavours or other flours as desired. It was tested by our competitors during the recent World Championships as a support product and it did not disappoint.

ROSSA | ATOMIC BAITS

CODE	KG	BARCODE
PC300B	3 Kg	8 033312 212740

Gli ingredienti e le caratteristiche di questa pastura, sono esattamente gli stessi della Bianca nello stesso formato, salvo il colore rosso che è dato dall'utilizzo di pane tostato di prima scelta, additivato con prodotti ed essenze naturali. Questa tonalità, si rivela micidiale in alcuni ambiti di pesca e consente anche all'amatore, che si cimenta per diletto e non per agonismo, di usare lo sfarinato come esca, bagnandolo e lavorandolo nella maniera appropriata.

The ingredients and characteristics of this bait are exactly the same as the white bait in the same format except for the red colour, which comes from the use of top-quality toasted bread with added natural products and essences. This shade proves to be fatal in some areas of fishing and allows even amateurs who fish for pleasure rather than competition to use the flour as bait by wetting it and working it in the appropriate manner.

GIALLA | ATOMIC BAITS

CODE	KG	BARCODE
PC300C	3 Kg	8 033312 212757

Pastura a tutto tondo, caratterizzata da un rapporto qualità/prezzo unico. Per questa pastura gialla da carpa e carassio, sono stati utilizzati ingredienti di prima scelta ed una nuova formula testata durante l'anno sui vari campi gara. Lo sfarinato, di grana media e con buone proprietà leganti, si adatta perfettamente all'aggiunta di esche vive e la sua flessibilità consente anche al pescatore amatoriale, di utilizzarla come esca lavorandola nella maniera idonea. Il formato "save money" da 3 kg è senz'altro una base da cui partire per le proprie miscele da gara, ma allo stesso tempo anche un buon prodotto con cui affrontare tutte le sessioni di allenamento, quando la pastura da bagnare dev'essere tanta e di buona qualità.

All-round unique value for money bait. For this carp and Crucian carp yellow bait, we have used high quality ingredients and a new formula which has been tested in various competitions throughout the year. The medium grain flour with good binding properties is perfectly suited to the addition of live bait and its flexibility allows even recreational anglers to use it as bait by working it in the appropriate manner. The 3 kg money saver format is certainly a good base for your competition mixes, but it is also a good product for all training sessions when you need a lot of good quality wet bait.

FONDO CEFALO | ATOMIC BAITS MARE

CODE	KG	BARCODE
PC55F	1 Kg	8 033312 041005

Pastura prodotta con farine di primissima qualità a grana fine a base di formaggio piccante appositamente studiata per la pesca al cefalo. Di colore chiarissimo può essere impiegata anche come esca sull'amo. È adatta per la pesca in acqua dolce e salata.

This light-coloured, fine-textured groundbait is produced from a mix of high-grade feed with a pungent cheese flavour, specially designed for grey mullet fishing. It can also be used as a paste and baited directly onto the hook. It is suitable for both fresh and saltwater.

SARAGO ORATA | ATOMIC BAITS MARE

CODE	KG	BARCODE
PC55D	1 Kg	8 033312 040985

Sfarinato a base di pura farina di sardine di primissima qualità che, una volta bagnata e lavorata, emana il caratteristico odore irresistibilmente invitante per i saraghi, le orate, gli sgombri, le boghe e le occhiate. Per la preparazione basta aggiungere allo sfarinato un'adeguata quantità d'acqua. Può essere usata per la preparazione del pasterello.

Meal based on first-rate pure pilchard which when wetted and worked, releases its characteristically irresistible scent, which is extremely inviting for white breams, gilt-head breams, mackerels, bogues and saddled breams. To prepare the groundbait just add a little water to the meal. Can be used as hook tying paste.

CEFALO COMPETIZIONE | ATOMIC BAITS MARE

CODE	KG	BARCODE
PC55G	1 Kg	8 033312 251954

Simile alla Cefalo, ma con un potere meno legante questa pastura è realizzata con farine di primissima qualità a grana fine a base di formaggio piccante appositamente studiata per la pesca al cefalo. Di colore chiarissimo può essere impiegata anche come esca sull'amo. È adatta per la pesca in acqua dolce e salata.

This light-colored, fine-textured ground bait is produced with a mix of high-grade feed with a pungent cheese flavor, specially conceived for grey mullet fishing. It can also be used as a paste and baited directly onto the hook. It Is suitable for both fresh and Salt water.

OCCHIATA SARAGO | ATOMIC BAITS MARE

CODE	KG	BARCODE
PC55E	1 Kg	8 033312 040992

Sfarinato con altissima percentuale di formaggio di primissima scelta, dall'intenso e caratteristico profumo che si esalta una volta che la pastura viene bagnata e lavorata. Pastura per la pesca del sarago, studiata e messa a punto da anni di agonismo ad altissimi livelli. Ottima anche per altri pesci quali salpe e boghe. Opportunamente bagnata, può essere anche innescata.

Meal based on a high percentage of high quality cheese releasing an intense and particular scent that intensifies when the groundbait is wetted and worked. Groundbait for white breams, developed and tested throughout years of top-level competitions. Excellent also for the fishing of bogues, saddled breams and saupes. When wetted it can also be used as bait.

ETANG | CHAMPION FEED

Pastura di granulometria medio sottile, con un potere legante medio di veloce disgregazione. E' stata realizzata per attirare bream, gardon in acque con corrente leggera ed acque ferme. Può essere mescolata con le altre miscele della linea Champions Feed.

Medium-fine grain bait with medium binding power and which breaks up quickly. Designed to attract bream and roach in light currents and still waters. Can be mixed with the other mixtures in the Champions Feed line.

CODE	KG	BARCODE
PCBEL31	1 Kg	8 033312 251961

GROS GARDON | CHAMPION FEED

Pastura da competizione sviluppata nei campi di gara di tutta Europa per la pesca dei gardon di taglia media e grossa. Dopo la bagnatura si presenta molto soffice con un potere legante medio. Ideale sia per la pesca in acqua ferma sia in acqua leggermente corrente.

Competition bait developed in competition venues all over Europe for fishing medium and large roach. After wetting, it is very soft with medium binding power. Ideal for fishing in both still and lightly flowing water.

CODE	KG	BARCODE
PCBEL30A	1 Kg	8 033312 251978

GROS GARDON FINE | CHAMPION FEED

Pastura a grana più fine della Gross Gardon per pesci di taglia medio piccola. Leggermente più legante per acque più veloci.

Ground bait with thinner grain than Gross Gardon for medium small fishes. Slightly more binding for faster running water.

CODE	KG	BARCODE
PCBEL30	1 Kg	8 033312 251985

WONDER SILVER - BY SPEEDO | CHAMPION FEED

CODE	KG	BARCODE
PCBEL10A	2 Kg	8 033312 252029

Pastura da fondo che lavora molto rapidamente. Usandola in acque correnti e profonde può essere integrata con terra di riviere. Miscelandola con altre pasture più leggere della gamma Champion Feed si otterrà una mescola ideale per la pesca in canali con correnti lente e nei laghi.

Bottom ground bait which breaks up rapidly. To use it in moving and deep waters we suggest to enrich it with Reviere sand. Mixing it with lighter Champion Feed groundbaits you'll get a mixture designed for canal and small lakes fishing with slow waters.

WONDER BLACK | CHAMPION FEED

CODE	KG	BARCODE
PCBEL13	2 Kg	8 033312 251992

"Il miracolo nero" è una pastura adatta sia per acque profonde e poco profonde, per correnti forti e deboli. Questa pastura attirerà al vostro amo sia breme che gardon. Anche se è nata come pastura da utilizzare d'inverno, molti pescatori hanno dimostrato la sua efficacia durante tutto l'anno. Può essere combinata ad altre pasture Champion Feed.

"The back wonder" is an all-pourpose ground bait for all kind of depths, for rapid and slow currents. This groundbaits attracts bremes end gardons. Projected to be used in winter many fishermen tested it all the year long conforming itsvalidity. It can be mixed with other Champion Feed ground baits.

FEEDER WORLD | CHAMPION FEED

CODE	KG	BARCODE
PCBEL60A	1 Kg	8 033312 234872

Pastura per la pesca di grosse Breme composta da farine a grana medio grossa ideale sia per acqua medio lenta che corrente. Può essere utilizzata sia singolarmente che in aggiunta ad altre pasture della linea champion feed.

Bait for fishing large bream consisting of a medium coarse grain ideal for both medium-slow and flowing water. Can be used either alone or in addition to other bait in the champion feed range.

FEEDSPECIAL GREEN DARK | CHAMPION FEED

CODE	KG	BARCODE
PCBEL60B	1 Kg	8 033312 234889

Pastura verde a grana fine e composta dalla migliore farina di pesce e una buona dose di betaina è perfetta per pesci di grossa taglia, può essere utilizzata sia singolarmente che mescolata ad altre pasture champion feed.

Fine-grained green bait composed of the best fishmeal and a good dose of betaine is perfect for large fish, and can be used either alone or mixed with other champion feeds.

HEAVY DAMP LEAM | TERRE

CODE	KG	BARCODE
PCBEL50G	2 Kg	8 033312 234094

Terra pesante a granulometria media ideale per il trasporto esche vive in particolare vermi, casters e fouilles che può essere impiegata sia in acque corrente sia in acqua ferma. Una volta raggiunto il fondo si apre e rilascia le esche velocemente. Può essere integrata con gli altri modelli di terre ed è ottima per appesantire la pastura in acque veloci o profonde.

Medium-grained heavy soil ideal for transporting live bait – especially worms, casters and red larva – which can be used in both running and still water. Once it reaches the bottom, it opens up and releases the bait quickly. It can be combined with other types of soil and is excellent for weighing down bait in fast or deep water.

BLACK LIGHT DAMP LEAM | TERRE

CODE	KG	BARCODE
PCBEL50B	2 Kg	8 033312 147332

Terra di somma di colore nero con basso potere legante molto sottile e soffice anche quando viene inumidita ulteriormente. Può essere impiegata da sola oppure aggiunta alle pasture. Si consiglia l'impiego in acque con poca corrente.

It's a black low power clumping very fine and soft leam, even when it's damped furtherly. It can be used on its own or added to the groundbait. To be used with slow waters.

LIGHT DAMP LEAM | TERRE

CODE	KG	BARCODE
PCBEL50A	2 Kg	8 033312 147325

Terra di somma con basso potere legante molto sottile e soffice anche quando viene inumidita ulteriormente. Può essere impiegata da sola oppure aggiunta alle pasture. Si consiglia l'impiego in acque con poca corrente.

It's a low power clumping fine and soft leam even when it's damped furtherly. It can be used on its own or added to the groundbaits. To be used with slow waters.

TERRA DI FIUME | TERRE

CODE	KG	BARCODE
PCI260C	2 Kg	8 033312 148964

Terra molto pesante, già inumidita, di colore scuro con un grande potere legante. Può essere impiegata da sola con l'aggiunta di esche oppure integrata con la pastura per appesantirla ed ancorarla bene sul fondo.

An extremely heavy soil, already dampened, with a dark colour and excellent binding power. Can be used on its own with live bait or else integrated with groundbait to weight it and anchor it to the bottom.

TORTURE MAIS | ATOMIC BAITS

CODE	KG	BARCODE
PCBEL22	1 Kg	8 033312 252012

Ingrediente utilizzato nella preparazione delle pasture ottenuto dalla parziale disoleazione del mais. Molto apprezzato dai pesci di grossa taglia ha un buon valore nutritivo ed uno scarso potere legante.

Sweet-corn. Attracts particularly bigger fish, has a good nutrient content and a low binding power.

BENTONITE | TERRE

CODE	KG	BARCODE
PCO01A	1 Kg	8 033312 148612

Terra grigia disidratata con altissimo potere legante. Può essere impiegata per aumentare il potere legante delle terre.

It'a grey leam with an high power clumping. It can be used to augment the binding of the other leams.

DRY LEAM | TERRE

CODE	KG	BARCODE
PCBEL50D	1 Kg	8 033312 147356

Terra di somma disidratata, ideale per scollare il fouilles prima di mescolarlo con terre e pasture.

It's a dehydrated leam, ideal to unstick the jokers before to mix it with the other leams and groundbaits.

GREY DRY LEAM | TERRE

CODE	KG	BARCODE
PCBEL50E	1 Kg	8 033312 147363

Terra grigia disidratata con altissimo potere legante. Può essere impiegata per aumentare il potere legante delle terre oppure per incollare il fouilles.

It'a grey leam with an high power clumping. It can be used to augment the binding of the other leams or to glue the jokers.

GOMMA ARABICA EXTRA FINE - TOP GUM | STICKYMAG

CODE	KG	BARCODE
COL10R	0,5 Kg	8 033312 234537

È una colla con un ottimo potere legante.Colore grigio molto chiaro ed una granulometria molto sottile, incolla molto bene i bigattini con e senza brecciolino e lascia la mano pulita.

Glue with excellent bonding power. It has a very light grey colour and a very fine grain size. It sticks very well to maggots both with and without grit and leaves a clean hand.

ARABIC GUM | STICKYMAG

CODE	KG	BARCODE
COL8	0,5 Kg	8 033312 013002

Collante per bigattini di incredibile potere addensante. Si differenzia dagli altri collanti in quanto mantiene le larve incollate senza cedere umidità anche a temperature esterne elevate.

Arabic Gum is a maggot glue that has an incredible thickening power. Unlike the other kinds of binder this glue keeps the maggots togetherwithout releasing moisture even at high outside temperatures.

STABILIX MAGGOTS | STICKYMAG

CODE	KG	BARCODE
COL9R	0,5 Kg	8 033312 013026

Integratore universale di collanti per bigattini. Ha la proprietà di mantenere inalterato il grado d'umidità dei bigattini incollati anche in condizioni atmosferiche avverse.

All round supplement for maggot glue. Stablix Maggots allows the degree of humidity of the glue maggots to remain unchanged even in different atmospheric conditions.

BALANCED WAFTERS (BOXES: 25G) | WAFTERS

Le Balanced Wafters sono delle esche morbide a galleggiamento bilanciato, grazia alla porzione centrale di diametro leggermente ridotta e alla loro morbidezza permettono un innesco ideale sia con la baionetta che con i bait bands disponibili in due diversi diametri 5mm e 7mm e 8 diversi aromi e sapori con colori altamente attrattivi . Le Balanced Wafters sono perfette da utilizzare sia con la tecnica method feeder sia con la tecnica pellet waggler. Questo mix di aromi e colori ci permette di catturare una vasta serie di prede in particolare carpe, carassi e breme.

Balanced Wafters are soft, buoyant baits. Their slightly reduced diameter in the central portion and their softness allow for ideal baiting with both bayonet and bait bands available in two different diameters (5 mm and 7 mm) and 8 different flavours with highly attractive colours. Balanced Wafters are perfect for use both for method feeder and the pellet waggler techniques. This mix of flavours and colours allows us to catch a wide range of prey, in particular carp, Crucian carp and bream. ROBIN RED
