

CRAZY FISH

2021

Amongst the millions of anglers around the globe, lure anglers are probably the most numerous, active and fastest growing. Dynamism and the relative simplicity of predator fishing with artificial lures attracts more and more fans to this wonderful pastime each day - everyone can easily find something that's of interest. Boat or shore, the city pond or long expeditions, summer and winter, supersensitive tackle or trophy hunting, there is a huge variety of ways to catch fish and methods to use - lure fishing has many faces and is amazingly entertaining.

To master all the techniques and methods that exist today is simply unrealistic and many lovers of this noble art consciously limit their range of interests, seeking to achieve excellence in a particular facet of lure fishing. What is the most popular among amateurs and professional sportsmen? What are the most successful and prevalent techniques today? Which fishing lures get most publicity in the fishing press? There are no two ways about it, it's the jig fishing of course. This way of catching any predator in any water has become the "golden key", opening the door to success for both the newcomer on his first fishing trip and the professional sportsman in a crucial tournament. Retrieving the jig and soft lure gives us an enormous variety of possibilities, it can be fished at any depth or speed and gives us the opportunity to catch predators of all kinds, regardless of their activity. The variety of baits used for this kind of fishing captures our imagination. Japanese and American manufacturers offer a range of soft lures for every taste but, of course, primarily for their own most capacious and promoted markets. For marine and freshwater fishing for bass, trout, mebaru, mackerel. Demand determines what is offered. It is clear that it would be quite naive to expect from legislators of the world's fashion any attention to the problems of the middle zone of European fishermen, most of them hunting for medium-sized perch, pike and zander. It is good that many baits from top brands nicely catch "our fish" as well but sometimes it would be desirable, especially during the difficult hot summer, to use something special. Something specially designed to tempt the finicky fish of our home waters.

The programme of soft edible baits from TM Crazy Fish was born precisely as a response to this, the long burning need to develop "edible" baits by European experts for our rivers and our fish. Crazy Fish soft lures are produced taking into account the specific requirements of European waters, with the participation of the European champions and passionate anglers. All models are tested by leading anglers, and then finalized with the obligatory view of test results, brought to perfection in everything - the shape, consistency and durability, flavours and colours are all optimised. Retaining all the best features of existing lures in the market, TM Crazy Fish improves and adapts them, bringing the catching efficiency of its models to the absolute premium. Of course, we have also taken into consideration one of the main requirements of our market, the affordability of baits for all anglers.

Soft baits, even edible ones, should not be expensive. The angler casting a lure in the water has to be able to focus only on positioning the jig correctly, right under the nose of the fish which sits amongst snags. Thoughts about the possible loss of expensive bait should not distract him, and soft baits from TM Crazy Fish fully comply with this requirement. The producer of this revolutionary product combines in its products such contradictory requirements as catching efficiency, effectiveness, and a very friendly price of soft lures.

Therefore, the massive usage of these models is provided. If at least some users give us their impressions about the successful usage of our products, or if you recommend any improvements of Crazy Fish baits, we will accept this with profound gratitude and try to immediately incorporate it into new models. Our success will be shared with you, our fishing will be the trophy, bright and unforgettable!

ARION

FOR FISHING FANATICS!

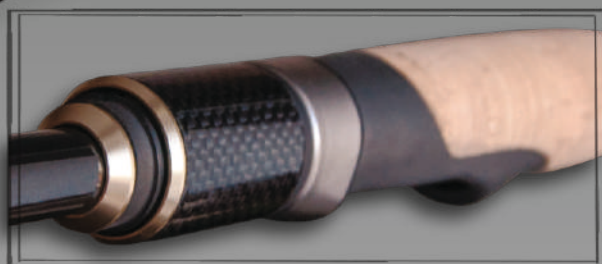

Arion. These are the lightest spinning rods in our range - the weight of the "heaviest" model is 66 grams. The blank material is Toray nanometer carbon 40T, which is used in space technologies. It is lighter, stronger and more responsive than the "ordinary" Toray Carbon 40T, which we use in our Perfect jig rods. Featuring Fuji's one-footed titanium T-series guides with Sic inserts and a VSS type reel seat.

Nano Zero & Nano One. This model of spinning rod was developed specially for nano-jig fishing. Whilst building the rod we used the lightest, high modulus Toray 40T carbon fibre blank material, along with the lightest Fuji components. This combination makes spinning as easy and balanced as possible.

Inspire

Delicate handle with carbon screw and slim foregrip

INSPIRE - is a great choice not only for newcomers who are starting their experience in the use of the micro jig, but also for experienced anglers. It was created in the tradition of micro jig fishing, and offers to angler the optimum in easy and effective handling. Made of carbon fiber Mitsubishi Rayon 30T, the rod allows one to control the bait, and thus making possible the most sophisticated of casting techniques. With this rod you can feel the slightest touch of the fish on the bait and react immediately to its nibbling, carry out a hooking just in time. At the same time, **INSPIRE** has a good deal of strength that will enhance the fisherman's chances of winning the struggle to retain his trophies.

The comfortable split grip handle is made of wear-resistant material EVA, and keeps the handle durable and warmer in the colder seasons. A shape of foregrip allows you to hold the rod in any convenient grip, thus increasing the sensitivity of the entire gear, and the control of the bait "in your hands."

The reel seat is equipped with a lower carboxylic nut. The rod is equipped with Korean guides. Arranging these guides in accordance with the KR-concept gives the fishing tackle greater sensitivity, greatly increased casting distance, and makes it fast-action rod by small runnings at the top of the rod. The fast and fine, "live" tip makes it possible for the angler to animate the lure with absolute precision, and identify the most delicate bite.

The rod copes extremely well with the tasks of classical micro jig and is also great for working with other rigs. The series offers tubular models as well as solid ones, with painted white solid tip. White colour enables visual inspection of the jig retrieve by the rod tip. This fishing rod will allow one to solve practically any task that can be put in front of the modern spinning fishing angler.

ASPEN STAKE

ASPEN STAKE – during the work on the creation of this rod it has gained many admirers. Stake is a striking example of a rational approach to rod building. And if one says you can't go and buy one spinning for every kind of fishing, do not believe it. You can! All the components implemented create an excellent yet affordable rod in the form of the ASPEN STAKE. Available options will pleasantly surprise you. This spinning allows you to work with all types of baits from micro spinners to large twitching wobblers. The unique geometry of blank combined with modern guides allows an angler to control the bait perfectly at any stage of retrieving from the casting to fishing out. Aspen stake is the ideal choice for any newcomer to the fishing. The more you spend time with it, the more you learn about spin fishing.

Aggressive design is fully corresponds with the spirit of the CRAZY FISH.

LEVIN

LEVIN - irreproachably designed and assembled rod. Lightness and durability of carbon fiber blanks from TORAY, ergonomics and functionality from FUJI, character and style of CRAZY FISH. The short rod length speaks of its boat lineage, but it does not prevent it being used effectively from the shore if necessary. Geometry of the blank allows you to control the most delicate animation of lure as well as fight with the big fish on equal terms. Fuji's new K-R CONCEPT on this blank gives maximum casting distance and overall sensitivity of tackle. A short full EVA handle competently balancing the rod and gives strict completed look.

LEVIN - the best that we can offer for the modern angler.

NANO JIG SPECIAL

ROGS

POLARIS is the most versatile lure for micro and light jig. Due to the geometry of the body it has incredibly realistic presentation in the water, imitating a leech, worm or larva. It's enough to give a slight impulse with a tip of spinning and the lure comes alive. Designed mainly for perch and bass, it can be successfully used for most kinds of fresh and salt water fish. Wide range of colours, 5 sizes from 30mm to 100mm and 6 different smells will help you to find the best lure exactly for your fishing conditions.

NANO MINNOW

**SECOND WIND
OF THE
LEGEND**

NANO MINNOW is really legendary lure. In size about 40mm it is definitely the most catchable soft shad on the market! It called NANO because we've started from a small size and this micro killer grew up in the last few years step by step. And now we are proud to introduce new members of bullhead family from CRAZY FISH - NANO MINNOW 70mm, 90mm and 120mm. It's not just a soft shad, it's highly detailed, very realistic imitation of real goby. But appearance is just a part of the game. All killing power of this lure is in a perfect geometry of body and tail. It works amazing on all kinds of rigs, with any sinker and without it.

Another feature of new NANO MINNOW is "flashing" colours. This elegant detail finalizes amazing style of new lure and takes us to a new level of soft lures production!

NIMBLE

NIMBLE is one of the most remarkable lures in a family of soft crawfish imitations. Designed with idea to make "alive" claws for working at one spot and hold the lure in a strike zone longer, using the slowest retrieve. It must have perfect action even if you want to fish without sinker or with very light heads. Due to perfect geometry of each element and soft material, the lure has spectacular presentation in the water while you retrieve it with any speed - from extra slow to quite fast. Also it's more than tasty during lift and fall. In other words - it works constantly and all the time, doesn't depend on the direction of movement. The softness of material is perfect, like a "golden mean" for light soft lures - sufficient for making **NIMBLE** alive in the water after the smallest impulse of your rod, but still durable enough for catching more fish, compared with many other similar baits. It can be used on regular or flexible jig heads, Dropshot, Carolina or Texas rig. Also it reaches good results rigged on weighted offset hook.

NIMBLE available in 4 sizes - 40mm, 65mm, 100mm and 125mm in more than 30 colors. Produced with squid smell. So you can choose the best combination to match your fishing needs. This amazing craw was designed for Bass and Perch, but it will be absolutely killing for Pike, Zander, Trout etc.

Qty per pack: 50mm/8pcs, 70mm/5pcs, 100mm/ 6pcs,

TOUGH - the perfect weapon to hunt for Pike, Zander, Bass and big Perch. This lure has long and thin body, similar to most "shad" type baits, but the main feature of the **TOUGH** is a massive, heavy paddle tail. In combination with the relatively thin body this tail gives off a very low frequency vibrations with large amplitude. Even at a very slow retrieve **TOUGH** imposingly waves with tail, which in its turn sets in motion the whole body and the bait creates active swings. An important stabilizing role in such swinging play protruding fins. On the belly of this lure there is a small flat fin which is designed for comfortable rigging with offset hook. An Offset Hook size 6/0 and 7/0 is ideal for this "TOUGH guy". In general, the bait produces a lot of vibrations in different directions. **TOUGH** is very agile and has the very qualities needed when trying to induce a take from pike and perch when they are lethargic, or in colored water. One tip for fishing the **TOUGH**, jigging with a jighead or flex head is excellent but also try it with a drop shot, Texas or. Carolina rig. It is recommended for catching Pike, Zander, Bass and Perch in lakes, canals and rivers with slow current. This lure contains natural attractant with real squid oil and now is available in sizes 70mm, 100mm, 125mm and 150mm.

ACTIVE SLUG is one of the first lures in the range of **CRAZY FISH**.

Now it has a new lease of life! The restyled shape gives it greater mobility during a short lifts and drops on the bottom. The front part reinforced, making it better suited for a double hook rig.

On the back of the lure there is a shallow groove for rigging an offset hook. The twist tail of the bait has become longer and more curved, with a weighted end. This gives it more vibrations and allows it to work for most low-speed retrieves. As with all

Crazy Fish soft lures **ACTIVE SLUG** contains natural attractant with real squid oil and is now available in three sizes: 50mm, 70mm and 100mm. It is safe to say that Pike, Zander, Bass and Perch will appreciate the new design of **ACTIVE SLUG** from the very first retrieve.

POWERTAIL

COLOUR CHART

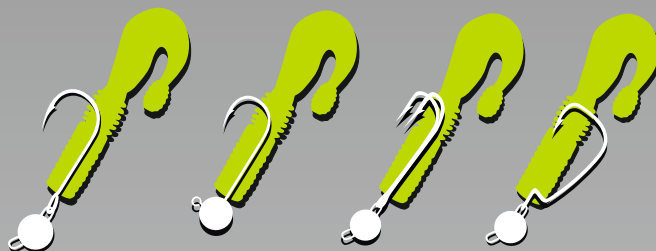

70mm

POWERTAIL is a twister with a weighted tail. This feature increases the frequency of vibrations, which often has a positive impact on the fish reaction. It allows you to use it on any rig, from classic jig head to no sinker rigs. And due to the high-frequency tail action it's good for slow animation in the different water columns. Especially over the grass on the slow retrieving, rigged on the weightless offset hook. The rings on the lures body create additional vibrations in water and increase the area of attractant radiation.

POWERTAIL is great lure for the pike, zander, perch and bass.

3D, 4D, 5D, 7D, 8D, 9D, 10D, 12D, 13D, 14D, 15D, 16D, 17D, 59RH

GLIDER - it's a slug from **CRAZY FISH**, primarily designed for fishing with a drop shot.

This lure has a few features which make it successful for drop shot fishing and other fishing techniques. Weighted tail works brilliantly at the slightest movement of the bait, creating a "tasty" shakes, imitating real fry, it provokes an attack from any predators nearby. As well as drop shot technique you can use it with common jig rigs closer to the bottom or in mid water. But if you use it without weight on the water surface the lure makes amazing glides from side to side, resembling motion of minnow wobbler. It is our first lure which is available in two different materials - floating and slow sinking. These features make it a really versatile bait that can be used on a jig head, a dropshot rig, or any predator set up. In the back of the bait there is a recess for rigging with offset hook. The optimum hook size for the 55 mm model is 10, for the 90mm model is size 2 or 4, and for 120mm is 3/0 and 4/0. **GLIDER** contains natural attractant with real squid oil which trigger the genetic response in all game fish to attack.

TIPSY

TIPSY 29MM COLOUR CHART

TIPSY 50MM COLOUR CHART

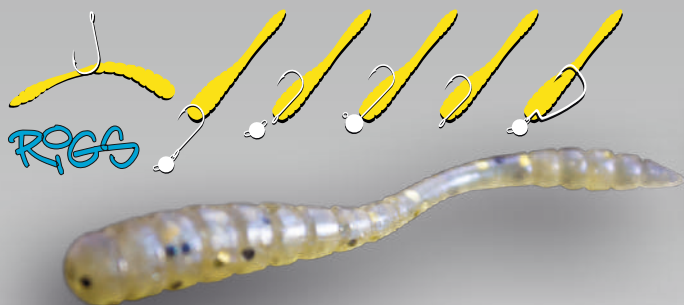

TIPSY - it's temptation. Even the most well-fed and sluggish fish won't pass by this lure. This slug belongs to a class of passive baits and reveals all its potential on the shaking animation, tempting not only predators but also a peaceful fish. **TIPSY** remains attractive in pauses, lying motionless on the bottom, showing all the charm of "edible" lures. This is possible due to attractants which are used in all **CRAZY FISH** soft lures. **TIPSY** made in 6 smells: anise, fish, roasted fish, shrimp, garlic and squid, which allows you to find not only the best colour but the smells for particular water column and its inhabitants. This tasty worm can be successfully used for perch, pike, zander or some peaceful fish, also for trout and chub in lakes and rivers, as well as for many kind of fish if you going to sea side for rock fishing.

Material: slow sinking with salt

Weight: 0,1g

Qty per pack: 20pcs (10/10 - two different colours)

Available attractants: shrimp, squid

WHITEBAIT is a small lollipop for a tiny fish. This really small lure was designed for unique style of ultralight fishing - Nano jig. This style implies the lures up to 40mm and light jig heads up to 1g. A tip of your rod should be as soft as possible for feeling everything on the end of line and making right animation of the bait. With such fine tackles you can catch everything and everywhere. You can expect to see absolutely all kind of fish on your hook, because the lure imitates something very small and easily accessible. Such style of fishing is topical in the cities, where the pressure on fish is too high. With nano jig you can catch a lot of fish within a short time even in such difficult conditions. WHITEBAIT was made according to experience of the best anglers from Ukraine, where this style was born. It has perfect shape, size and colours to match to any conditions of Nano jig fishing. Comes in 20mm, 14 colours, anise, shrimp and squid scents with salt inside. Packaging includes 2 different colours of lure!

Available attractants: shrimp, squid

Underwater
Video

85mm

DAINTY was designed to swim with a great rocking action, produced by the massive paddle tail. It's great for steady retrieves without weight, or on light or heavy heads for jigging and vertical fishing. The fat body profile makes it perfect to mount on all types of jig heads and hooks, it goes especially well with double hooks. The heavy paddle moves very nicely at the slowest speeds thanks to the slim tail section and very soft material, which makes this lure very lively in the water. **DAINTY** will catch any predatory fish in both fresh and salt water! Designed for zander but also deadly for perch, pike, bass etc.

DAINTY 85MM COLOUR CHART

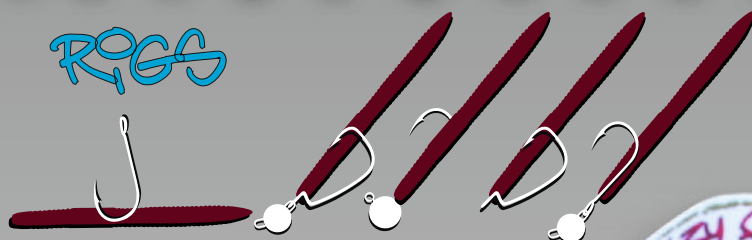

MAGIC STICK

MAGIC STICK 130MM COLOUR CHART

ROGS

Underwater Video

MAGIC STICK is a delicious chubby worm, designed mainly for Bass. This stick has a little bit thicker tail part, that's why you can cast it longer than regular worms of this type. Compared with all CRAZY FISH lures this worm has more salt so it is heavier than common soft lures. It gives advantage when you want to use it on Wacky rig without weight. It goes down little faster than other lures and due to softness of material it looks alive in the water. Can be Texas rigged, using in Wacky style, on Dropshot or on different kind of jig heads.

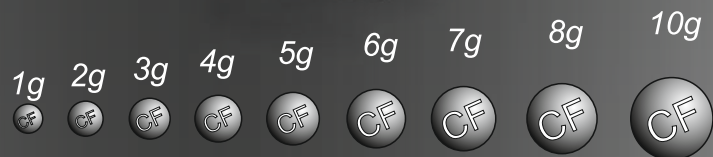

Model: MAGIC STICK
Size: 130mm
Material: sinking with salt
Weight: 8,7g
Qty per pack: 8pcs
Available attractants: squid
